SATURDAY, AUGUST 14, 1869.

Our Only Authorized Agents: T. V. JULIEN, Agent of the Pacific Union Express Company, is Agent for this paper at Winnemucca. L. P. FISHER, 20 and 21 New Merchants' Exchange is our only authorized agent in San Francisco, Cal, HUDSON & MENET, 41 Park Row, is our sole agent in New York City,

THE ELKO AND IDAHO ROAD .- We are indebted to O. R. Johnson, Superintendent of the Elko and Idaho Road, for the following account of its progress: Work began on the road on Monday last, at the terminus, near town. The road comes in to Elko near the Elko Brewery, then passes in as near a straight line as the character of the country will allow, to the high mountain to the west of town. To-night eleven miles will be finished, and the summit of the mountain will be passed. This is the most difficult part of the work. From the summit the road descends by easy grades to the nameless valley beyond, through which the work will be very light. The road is be-ing built in the most thorough and substantial manner, and will be completed as fast as a large and thoroughly organized gang of men can do it. We hope there will be no want of funds to carry out the plans of the Superintendent, who will make this road as it ought to be-one of the best in our State. Let those who have subscribed to the stock be prompt in their payments, and those who have not subscribed do so at once. There should be no hanging back in this work by the business men and teamsters of our town. It will be an important work to all, and all should be ready to come down with the cash liberally.

COPPER ORE.-J. J. Kellogg laid on our table yesterday some very rich specimens of copper ore, from the Union lode, Battle Mountain district. The samples we have, show pure copper in quite large grains, and red and black oxide in masses. The lode from which these samples were taken is three feet and a half wide and has been traced for a distance of two hundred feet. It is only five miles from the C. P. R. R., and a good natural road all the way. Mr. Kellogg goes down to-day to take out a quantity of the ore and ship it to San Francisco. Besides the copper, the ore contains thirty-eight dellars in gold. The selected ore will work sixty per cent, in coppler. This will be a valuable mine, and we wish our old friend success in its development. friend success in its development. A reduction in freight on the railroad would do more to develop the mines of this section than anything else, as much of the proceeds of the mine are now consumed in getting base ores

Cork.—Enright came in Wednesday afterbeen discovered and new placer diggungs found turn to filke by the first of October. 1617 both up and down the Owyhee. Work is being pushed shead on the California and Argenta, with the very best results. Cel. Prew Will have a mill running in about sint days Will have a mill running in about sint days when we may look for the "substitutial argue will day of Aurost, A. B. best at 120 creek, Mr. for ments" in the shape of silver bricks. Work | declust shine of materials and bundance of a second court flower and Jan, in accordance with plans and on a ditch to bring water on the placers has already begun, and will be completed in about six weeks, when we will have gold dust along with silver. Everybody is chearful, and Mountain City is fast becoming a substantial feyor. Several adobe haddings ere galag up and adkiln of brick is being put up.

HAD TREER ARROW COOK IS - On Wednesday, as the refreshing zephyrs of evening waited ; balmy breezes over the placid waters of the Humboldt, a loving couple could have been seen strolling along the willow-tringed mea-

in an anguent-I moment, both mi-sed their posture and fell into the cold and uninviting water, which most effectually cooled their ardor and wet their other fixins. Lovers should exercise discretion and keep away from the river in their rambles of love, etc., until the shades of night mantles the tattling orb of

New Discovery .- Quite an excitement has existed among some of our people for the last twenty-four hours about the discovery of a COME AND OBTAIN THE REQUISITE gold and silver-bearing ledge, some ten miles distant from town, in a northwesterly direction. The ledge is about eight inches wide, and is said to pan out largely in gold by the simple process of pounding the rock and washing the pulp on a shovel. The ore is sup-posed to contain silver, but as no definite results have yet been obtained by fire assays, it is mixed as to the richness of the ore. If there is one vein of the character represented, it is quite likely that others will be discovered in that neighborhood, as prospecting will be directed that way during the coming week.

New Buildings are springing up all over all are being constructed in a thorough manner. Those who undertake to live out the coming winter in old tents will wish some fine day when the snow is coming down and old Boreas turned loose, that they had been wise and put up good houses.

Faurt.—Our market is abundantly supplied with all kinds of ripe fruit, and at such reasonable prices that it is not a luxury. The black, or mission grape has just begun to come in, though most of those we have seen were not ripe. We have never seen any grape that suits our taste so well as the old mission va-

Ontons.—Walking down the depot platform a few evenings ago, we suddenly exclaimed: REAL ESTATE & GENERAL AGENT "Lord, what onions!" There was a big pile of sacks filled with onions about the size of a plug hat, and as smooth as any Long Island "truck grower" would wish to see. We put California against the world for enious. The women ain't slow.

CHICKENS.—Last Wednesday's freight train brought down a platform car loaded with chickens, 1,080 in all. They were purchased in Cash and Bear valleys, Utah. This is a very healthy place for chickens; havn't seen a dead one for some time.

HON. Tom Firen has our thanks for valuable public documents. "Raymond's mineral resources of the West" contains a vast amount of valuable information on the subjects upon In rear of the Cosmopoletan Hotel and Passenger De which it treats. The "Congressional Directory" is also highly prized.

RACES TO-DAY .- There will be a grand quarter-race, just below town, this afterneon, between John George's horse and the horse Tom. Rare sport is anticipated, as considerable money is at stake. Other races will probably be made,

THE INDEPENDENT folks received an invitation to lunch yesterday from Messrs. Haag & Daveluy, the gentlemanly proprietors of the Tuolumne Saloon, and responded by making prompt ppearance there at 11 o'clock, and partook of an elegant lunch, with other friends. After the eatables were duly disposed of, a merry hour was passed over the wine. California fruits were brought in by Mr. L. Shocken and duly appreciated. Two happy hours were passed in pleasant conversation over the choicest California wines, and the party left wishing good luck to the the generous proprictors of the Tuolumne Saloon.

COUNTY COMMISSIONERS.—The Board of Commissioners have been in session for several days, examining plans for county buildings and getting up proper specifications. We are glad to see that the members of the Board are doing all in their power to secure the erection of good buildings and at a reasonable cost.
